HUSKY Maternity Bundle Payment Program

May Provider Forum

Welcome to the HUSKY Maternity Bundle Provider Forum

Please see the meeting's ground rules below:

This forum will be recorded and posted to the DSS Youtube channel. Meeting materials will also be posted on the DSS Maternity Bundle website.

If you are not speaking, please mute yourself.

Please limit use of the Chat for Zoom technical and audio issues only.

Please use Q&A feature or raise your hand to ask questions.

Agenda

Goals for Today

- Share program updates and guidance on common encounter form questions
- Provide more information about the quarterly quality reports
- Share a provider resource to support perinatal mothers with mental health and/or substance use disorders
- Answer your questions and listen to your program experience to date

Program Updates & Guidance

Program Update: Family Medicine Opt-In

In response to provider feedback, DSS has introduced an opt-in option for participating Maternity Bundle practices to include their family medicine providers in the program.

- For family medicine specialty types, if practices demonstrate that their family medicine providers render maternity care, practices may request that these providers be added to the program.
  - This will enable family medicine providers within your practice to receive the Case Rate payment (as opposed to receiving FFS payment), and the costs of their care to be included in the year-end reconciliation calculation.
- In PY 1, DSS will review requests and approve on a case-by-case basis throughout the year.
  - If you're interested in this family medicine opt-in option, please contact your practice's Provider Engagement Services (PES) representative or reach out to the Maternity Bundle PES email at maternitybundlequestions@chnct.org.
- In PY 2 and beyond, DSS will perform case-by-case reviews and approvals on an annual basis, prior to the start of each program year.

Case Rate Trigger Event Reminder

Effective April 2025, practices may initiate Case Rate payments for patients in the second trimester, third trimester, and postpartum period.

***Reminder:* To qualify for Case Rate payment, providers must meet the following criteria:**

- Perform 30 or more deliveries annually
- Submit a claim with a trigger diagnosis code (outlined in the Code List on the DSS website) and one of the following Evaluation & Management (E&M) codes 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215.
- Submit a claim with a qualifying place of service location: 11 (office), 19 (off-campus outpatient hospital), or 22 (on-campus – outpatient hospital)
- Bill as a qualifying maternity bundle specialty type, which includes Obstetrics and Gynecology (including the subspecialty MFM), Certified Nurse Midwife, Obstetric Nurse Practitioner, and Women's Health Nurse Practitioner.

Common Errors

- HUSKY Member ID not found
- HUSKY Member ID 1 does not match Member ID 2
- CMAP Provider ID not found

Submission tips for user(s):

1. Submit Member IDs in a 9-digit format with dashes – **XXX-XX-XXXX**
2. Both member ID fields match
3. Submit correct CMAP Provider ID in a 9-digit format with dashes – **XXX-XX-XXXX**

CHNCT PES Support

- CHNCT will audit encounter forms for errors monthly.
- Practices should expect CHNCT PES Reps to follow up with audit error data.

Provider Quality Reports

Quarterly Quality Reports

As part of this program, participating providers will receive quarterly data reports to assist in monitoring their performance on the program's quality measures.

- DSS provided the **first data report on April 30, 2025**, acknowledging that data from the first quarter of the program will be limited.
  - Practices should have received their Quarter 1 report by email from their designated CHNCT, Inc. Provider Engagement Services (PES) representative.
  - For more guidance on the quality report, you may email the new Maternity Bundle PES email (maternitybundlequestions@chnct.org) or contact your practice's PES representative.
- Going forward, DSS will share the data reports on a quarterly basis, and practices can expect to receive their second report on **July 31, 2025**.

Data Acknowledgements

Quarterly Dashboard (Performance and Reporting Measures)

- Reports will reflect a two-month lag (1 month claims lag and 1 month processing lag)
- Each quarterly report will include data on a rolling year-to-date basis

Quarter	Data Months Included	Report Publication
1	January	April 30, 2025
2	January, February, March, April	July 31, 2025
3	January, February, March, April, May, June, July	October 31, 2025
4	January, February, March, April, May, June, July , August, September, October	January 31, 2026

- Encounter form data will begin to be reflected in the Q3 report. Includes:
  - Doula (for Opt-in practices)
  - BH Risk Assessment
  - Breastfeeding

DEPARTMENT OF SOCIAL SERVICES

Performance Measure Rate - Provider Report

ALL Providers | **2025-Jan**

During quarterly data updates, low case numbers can affect the measures not meeting the thresholds. The exact quality scores will be produced annually during the reconciliation calculation. Each quarterly report will show YTD results. Results include one month of claim runout. Encounter form measure results will not be reflected until Q3 reports.

Program Resources

For more information about this program, DSS has created the following program resources, which can be found at the **DSS Maternity Bundle Website**. Updated or new resources are highlighted below.

Category	Program Resource
Program Overview	• **Program Overview** with a glossary of key terms • **Program FAQ** based on frequently asked questions raised during provider forums and office hours • **Video Resource Guides** about the MB Program, Case Rate payment, and incentive payment
Technical Details	• **Program Specifications** containing all technical details pertaining to the program • **Code List** containing the list diagnosis trigger codes, case rate codes, case rate termination codes, and reconciliation codes • **Sample 835 File** to preview a mock-up 835 file for case rate and incentive payments • **Billing Example** to show how claims will be processed (either pay FFS or zero pay) under the program • **835 & Paper RA Examples** to illustrate sample $0-paid 835s/paper RAs and Case Rate-paid paper RAs • **Supplemental Payment Test File** to preview a mock-up of the provider supplemental file
Quality & Reporting	• **Sample Encounter Form** for data submission on select Pay-for-Reporting measures • **Quality Measures Reference Guide** for general guidance on the program's quality measures and reporting requirements
Doula Integration	• **Resources, form templates, and model policies** that doulas/practices may use and customize when partnering together

CHN PES Support: For any questions related to this program, please email the new Maternity Bundle PES email at **maternitybundlequestions@chnct.org** or contact your CHNCT, Inc. Provider Engagement Services.

ACCESS Mental Health and Substance Use for Moms

Your Link to Psychiatric Consultation, Support, and Resources

Presented by: Beth Garrigan
May 6, 2025

Overview

FREE, real-time psychiatric consultation with seasoned reproductive psychiatrists to help providers treat their patients with mental health and/or substance use concerns.

- Front-line treating providers (i.e. obstetricians, primary care providers, psychiatrists)
- Pregnant or postpartum individuals up to 12 months post-delivery, regardless of insurance
- Statewide – Monday-Friday 9am-5pm
- Trainings and toolkits on mental health and substance use screening and treatment

Model

Provider: Obstetric, Primary Care, Psychiatry

Treating Provider feels stuck and isn't sure what do next?

Provider calls **833-978-6667** and talks directly with perinatal psychiatrist every call

Perinatal psychiatrist provides diagnostic clarification, psychopharmacology and counseling recommendations and, if needed, offers resource and referral support to patient

Resource and Referral Support team outreaches to patient to help them find services

Face-to-face consultation

ACCESS Mental Health and Substance Use for Moms

Training

Join our ACCESS Mental Health and Substance Use for Moms Hub Team Reproductive Psychiatrists for a free, monthly educational discussion on a variety of mental health and substance use topics for obstetrical providers. Monthly meetings will be virtual through the Webex platform and will provide a short, structured didactic followed by an open discussion.

Second Thursday of Every Month 12:30pm – 1:30pm

ACCESS Mental Health and Substance Use for Moms

Outcomes

Obstetricians, Midwives, Pediatricians, and Adult Psychiatrists have called requesting support!

June 2022 – December 2024:

- ✓ 2,667 psychiatric consultations have been provided benefitting 439 perinatal individuals (about half were Medicaid members).
- ✓ 344 perinatal individuals received resource and referral support at the request of their physician and connected to vital services addressing mental health, substance use, medication management, parenting, and social factors.
- ✓ 24 live training sessions have been provided and recorded since the start of the series. www.accessmhct.com/moms/training/

Provider Feedback

"The ability to call and get guidance has been a game changer for me!" ~ Midwife, Fairfield County

"Whenever I have used this program, I have felt so reassured by the help I have received. Thank you!" ~Obstetrician, Windham County

"It's an amazing service. To be able to get medication advice and referrals for patients with a single phone call is remarkable." ~APRN, Fairfield County

"She [AMH for Moms Hub team psychiatrist] was amazing. That was one of the best experiences consulting. She was kind, intelligent and had so much wisdom to share." ~ Obstetrician, New Haven County

"Resources are EXCELLENT!!!!" ~Obstetrician, Fairfield County

"I feel better about knowing how to respond to a positive screen" ~Midwife, Fairfield County

Patient Feedback

"...Thank you so much again. Just knowing your program exists made me feel less alone and gave me hope in my hardest days so far." Mom after receiving resource and referral support, New Haven County

"You have been so helpful to me at a time in my life when I really needed it- so thank you. Sincerely - thank you for continuing to check in with me because I probably would have never sought out the help I needed." ~Mom after receiving resource and referral support, New London County

"Thanks for checking in on me. I was just confirmed for a therapy appointment. That was so fast and painless. I truly appreciate your help in getting me there." ~Mom after receiving resource and referral support, New Haven County

Appendix: Program Details

January 1st, 2025 Program Launch

After several years of extensive stakeholder engagement and program design, DSS launched the HUSKY Maternity Bundle Payment Program on January 1st, 2025!

We appreciate the close engagement of the many stakeholders who helped inform and shape this program, and we plan to continue to work closely with HUSKY Health providers, members, and stakeholders to ensure the program rolls out as designed, to evaluate its performance, and to iterate on the program design accordingly.

Early member engagement to understand experiences, needs, and opportunities

HUSKY member focus groups

Extensive stakeholder engagement to develop a conceptual program model and define the program's technical details

Maternity Bundle Advisory Council (MBAC)
MBAC Doula Subcommittee
MBAC Provider Payment Subcommittee
MAPOC Women and Children's Subcommittee

Provider focused engagement

Provider Forums
DSS Office Hours
1:1 Provider Meetings

Upcoming…

Continued stakeholder engagement and iterative program refinements after PY 1

Maternity Bundle Program Overview

Under this program, Medicaid obstetrics or licensed midwife practices will be responsible for both the quality and cost of care provided during the “maternity episode” or “maternity bundle.”

Program Start Date: January 1, 2025

Eligible Providers: Maternity practices who deliver 30 or more births per year

Maternity Episode: An episode of care describes the total amount of care provided to a patient during a set timeframe. In this program, the maternity episode covers care through the prenatal, labor & delivery, and postpartum periods.

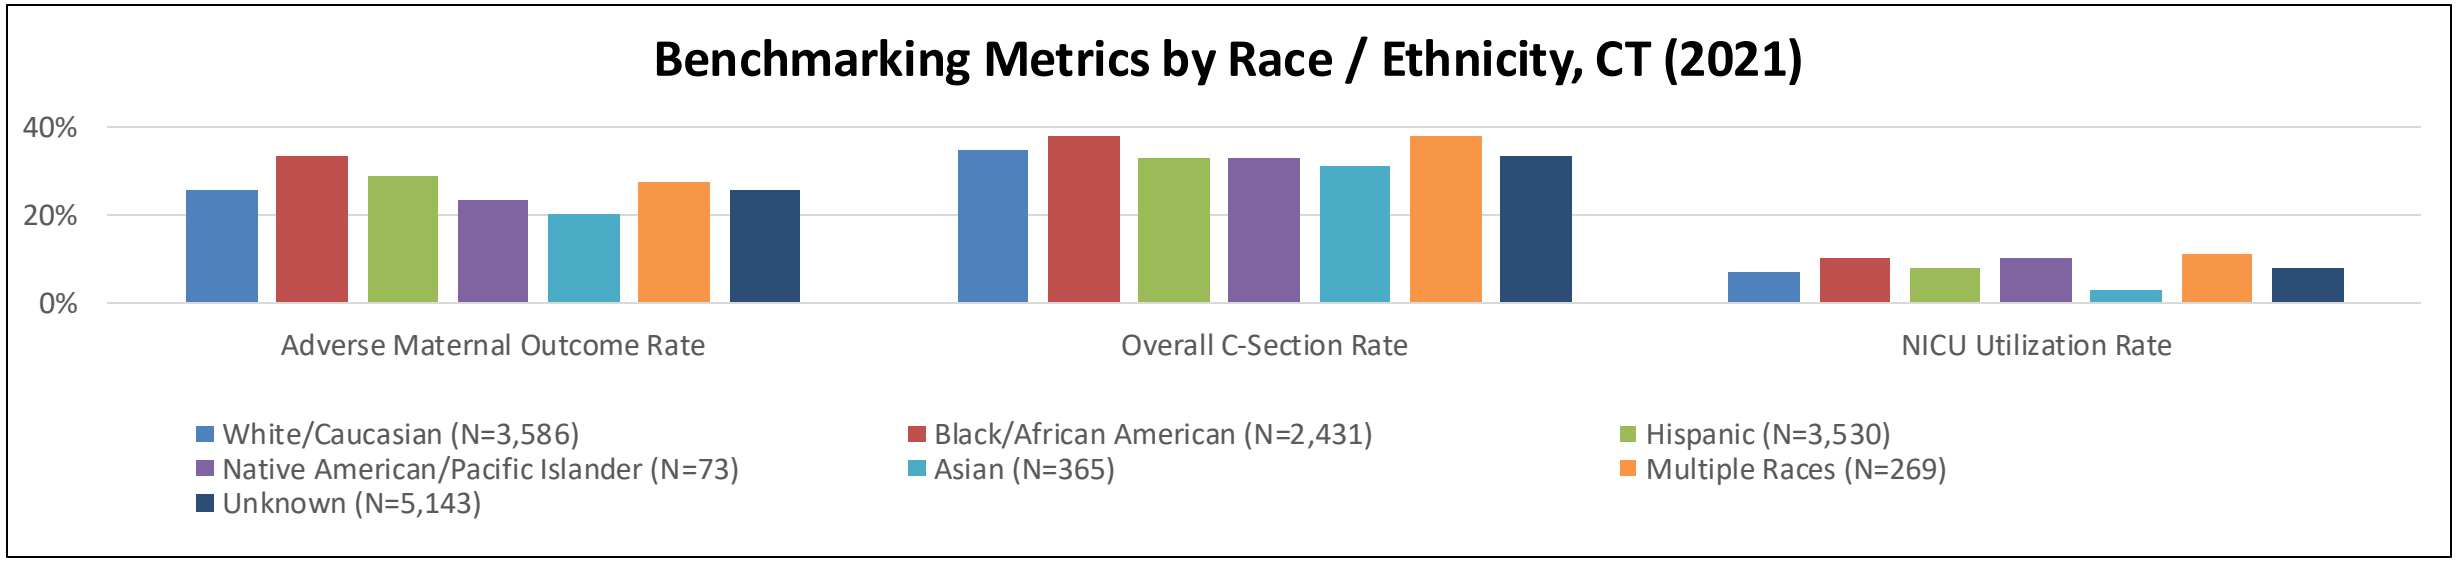
Program Goals:

- **Strengthen maternal health** in CT Medicaid with enhanced flexibility to deliver person-centered care
- **Promote health equity** through program design and health disparity reduction targets
- **Improve health outcomes** and higher quality care through performance-linked quality measures
- **Increase patient satisfaction** with new coverage of community-based, peer resources
- **Reduce unnecessary costs** through greater efficiency and care coordination

Starting Point: Disparities in Maternal and Infant Health

Despite efforts to incentivize improved care and health outcomes under the current FFS model, DSS saw a **rise in adverse maternal outcomes, C-section utilization, and NICU utilization** among HUSKY Health members between 2017-2021.

- In 2020, Connecticut Medicaid's overall c-section rate (33.3%) was the highest in New England and 7th highest in the United States[1]
- Connecticut has the 8th highest Neonatal Abstinence Syndrome (NAS) rate per 1,000 births in the country[2]
- Additionally, DSS observed substantial racial health disparities. For example, Black/African American members have the highest Adverse Maternal Outcomes rate and the highest Overall C-Section rate.

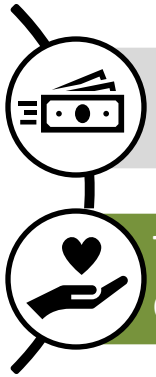


Sources: 1: Health Care Cost Institute (June 2022) 2: CT NAS Data Visualization (Sept 2020)

Data Source: CT DSS Data, provided by CHN

Episode-Based Payment Model

The launch of the Maternity Bundle Program supports the transition from a FFS payment model to an episode-based payment model for maternity care.



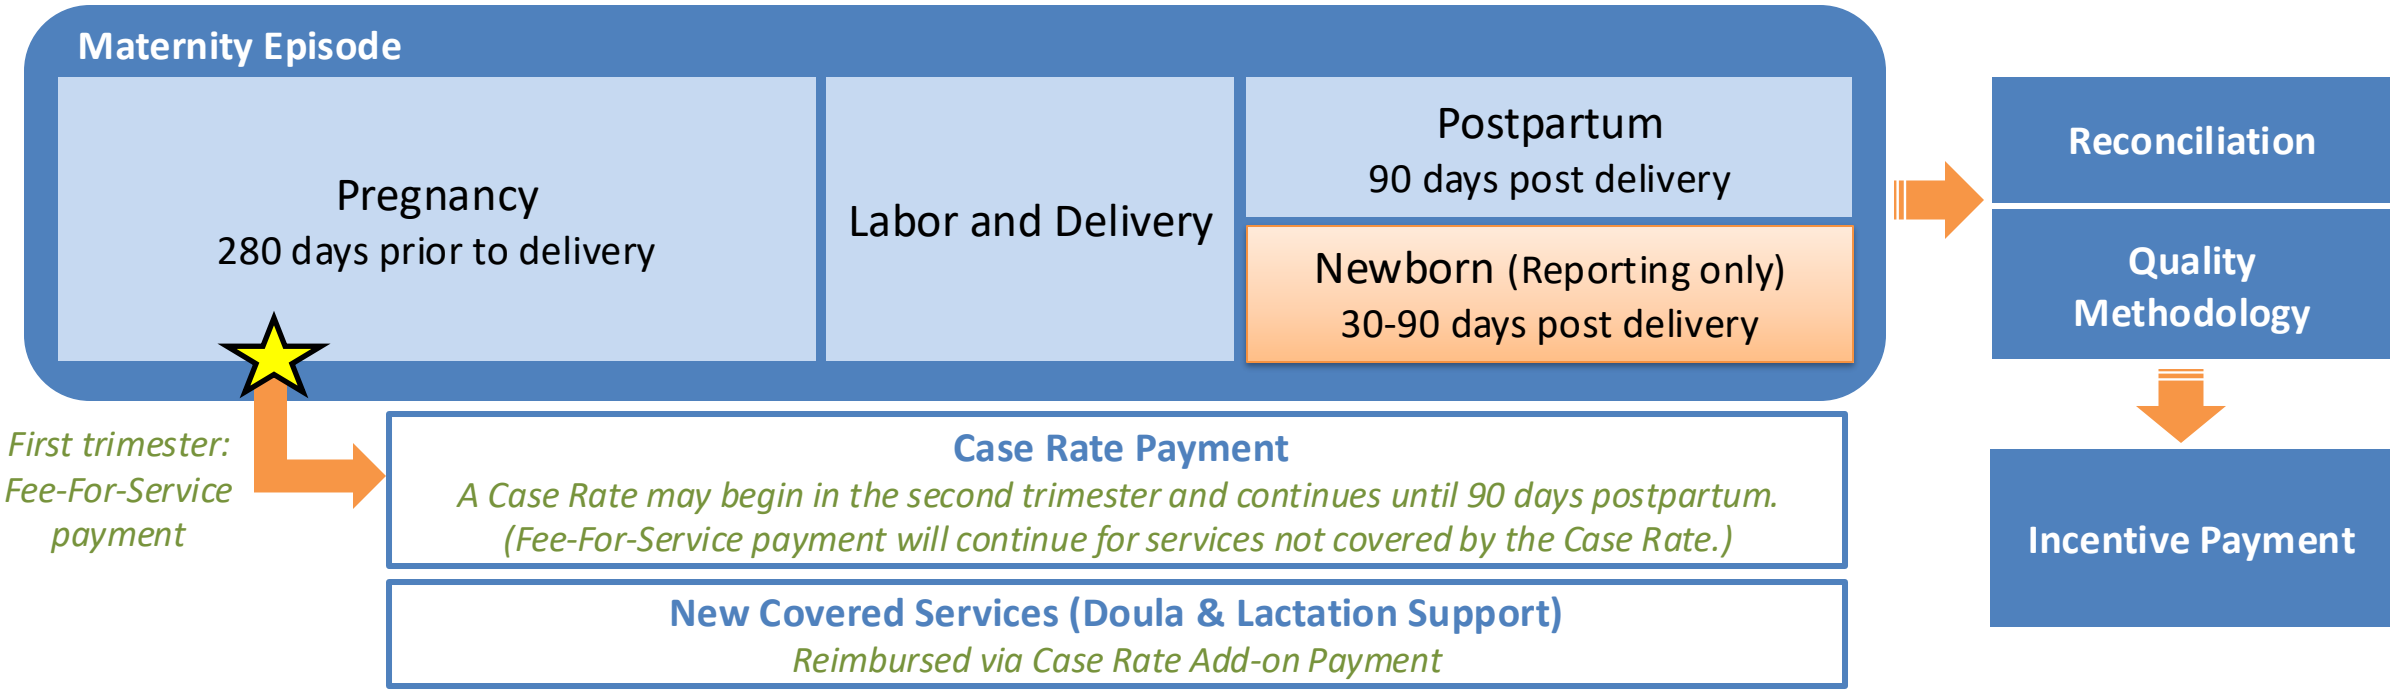
The current FFS system rewards providers for the **volume of services provided, regardless of quality or outcomes.**

The maternity bundle episode-based payment model **holds maternity care providers responsible for both the quality and cost of care** provided during the maternity episode.

Key Program Components	Value
Provider-specific **"case rate" payments**	Encourage flexibility in care delivery and incentivize early engagement with members, enabling practices to provide right care at the right time
"Incentive" payments (shared savings bonus payments)	Providers who meet quality performance standards and lower costs relative to a target benchmark are eligible to share in savings – creating an incentive to reduce unnecessary costs and improve efficiency
New coverage of **doula and lactation support** services	Enhance patient-centered care through access to high-value, peer-based services
Quality measures	Ensure high-quality care and improvements in care
Social and clinical risk adjustment	Rewards providers who care for Medicaid members with greater social and health needs

Maternity Episode

An episode of care describes the total amount of care provided to a patient during a set timeframe. In this program, the maternity episode includes services across all phases of the perinatal period, spanning 280 days before birth to 90 days postpartum.



Maternity Episode Services

See the full list on slide 23.

Pregnancy

- Monthly prenatal visits
- Routine ultrasound
- Blood testing
- Diabetes testing
- Genetic testing
- Doulas
- Care navigators
- Group education meetings
- Birth education classes
- Preventive screenings (chlamydia, cervical cancer, etc.)

Labor & Delivery

- Vaginal delivery
- C-section delivery

Postpartum

- Breastfeeding support
- Depression screening
- Contraception planning
- Ensure link from labor and birth to primary and pediatric care occurs for birthing person & baby

Accountable Providers

Ambulatory maternity providers who have the greatest role in delivering obstetric care will be designated as the episode's accountable provider.

Accountable Providers

- Ambulatory maternity providers (i.e., qualified licensed physicians, nurse practitioners, and nurse-midwives) who have **the greatest role in delivering obstetric care** will be designated as the episode's Accountable Provider.
- Accountable providers must meet a **minimum volume threshold of 30 or more deliveries annually** to participate.
- Accountable providers will be transitioned from the existing OB Pay for Performance (OBP4P) program to the Maternity Bundle Program.

Non-Participating Providers

- FQHCs and providers who perform fewer than 30 deliveries annually will be ineligible to participate in the program and will be paid according to their current payment methodology.
- Non-participating providers may still opt to participate in the OBP4P program.

Case Rate Payments

DSS designed the maternity bundle's case rate payment to give providers greater flexibility in how they deliver care and increase investment in maternity care providers.

- **Case Rate Payment Overview:** **DSS will make monthly "case rate" payments** for a subset of services, which includes the majority of prenatal, labor and delivery, and postpartum care that a birthing person receives. Each practice's case rate is based on historical second trimester, third trimester, delivery, and postpartum professional claim expense for historically attributed episodes.
- **Rate Development:** DSS anticipates that the case rate payment will provide an **opportunity for providers to earn additional revenue**, adding an estimated $6 million in expenditures annually. DSS rigorously developed the case rate payments based on each practice's historic utilization and FFS billing. DSS also tested case rate payment through the program's historic simulation and a separate fiscal impact analysis.
- **Program Monitoring:** **DSS will monitor changes in member access, practice revenue, and billing patterns** after program implementation to ensure that the roll-out of case rate payments occurs as designed and to preserve HUSKY Health members' access to care.
- **Rate Rebasing:** **DSS will rebase the case rates** no more than once annually to account for changes in risk mix or service delivery over time.

Doula and Lactation Supports

DSS plans to incorporate access to doula services and lactation supports as core features of the HUSKY Maternity Bundle Payment Program to bridge the equity gaps for historically marginalized birthing people.

DSS is utilizing a dual approach to provide and fund access to doula services in Medicaid:

1. **Paying through the maternity bundle**
   Maternity bundle providers have the option to partner with doulas, who will receive payment through the bundle.

2. **Paying fee-for-service**
   DSS anticipates implementing direct Medicaid reimbursement of certified doulas as a separate but parallel doula payment pathway.

In addition, DSS will also provide coverage of lactation support services through the maternity bundle.

- All maternity bundle providers will receive payment through the bundle.
- The new high-value services shall be provided under the supervision of the maternity bundle providers and within both the scope of the provider's overall services and the provider's plan of care for each beneficiary.

Maternity Episode Services

Services included in the maternity episode will be subject to a retrospective reconciliation to calculate the incentive payment amount.

Included Services	Excluded Services
➢ OB/licensed midwife Professional Services ➢ ***In-house*** OB/licensed midwife Professional-related hospitalization costs (Inpatient, Outpatient, and ED) including professional delivery fees ➢ OB/licensed midwife Professional-related Behavioral Health Evals, including screening for depression and substance use ➢ Screenings (general pregnancy, chlamydia, cervical cancer, intimate partner violence, anxiety) ➢ ***In-house*** OB/licensed midwife imaging ➢ ***In-house*** labs and diagnostics ➢ Prenatal group visits ➢ Care coordination activities ➢ Any of the above services provided via telehealth • *If performed outside the participating Accountable Provider:* OB/licensed midwife imaging & labs • Birth Centers and hospital costs related to maternity care • Specialist/Professional Services related to maternity (e.g., anesthesia) • General Pharmacy related to maternity	• Pediatric Professional Services • Neonatal Intensive Care Unit (NICU) • Behavioral Health & Substance Use services • Long-acting reversible contraception (LARC) • Sterilizations • DME (e.g., blood pressure monitors, breast pumps) • High-cost medications (specifically, HIV drugs and brexanolone) • Hospital costs unrelated to maternity (e.g., appendicitis) • Other Care, including Nutrition, Respiratory Care, Home Care, etc. • Maternal Oral Health services

Key: ➢ Services reimbursed and included in the Case Rate.
• Services reimbursed Fee-For-Service

Incentive Payment

Accountable providers can earn incentive payments when total cost of care is lower than the target price, if they also meet quality performance criteria and comply with under-service prevention requirements.

- If episode costs are below the "target price" (the target benchmark), providers will receive a retrospective (i.e., at the end of the bundle) "incentive payment" (shared savings) based on their quality performance.
- This program is upside only, which means providers can only earn incentive payments as a bonus for delivering high-quality, cost-efficient care; there are no penalties if the provider's costs exceed the target price.

Target Price

The provider-specific target price is the expected total cost of care for the maternity episode based on a blend of the statewide average cost for maternity care and the provider's historical cost.

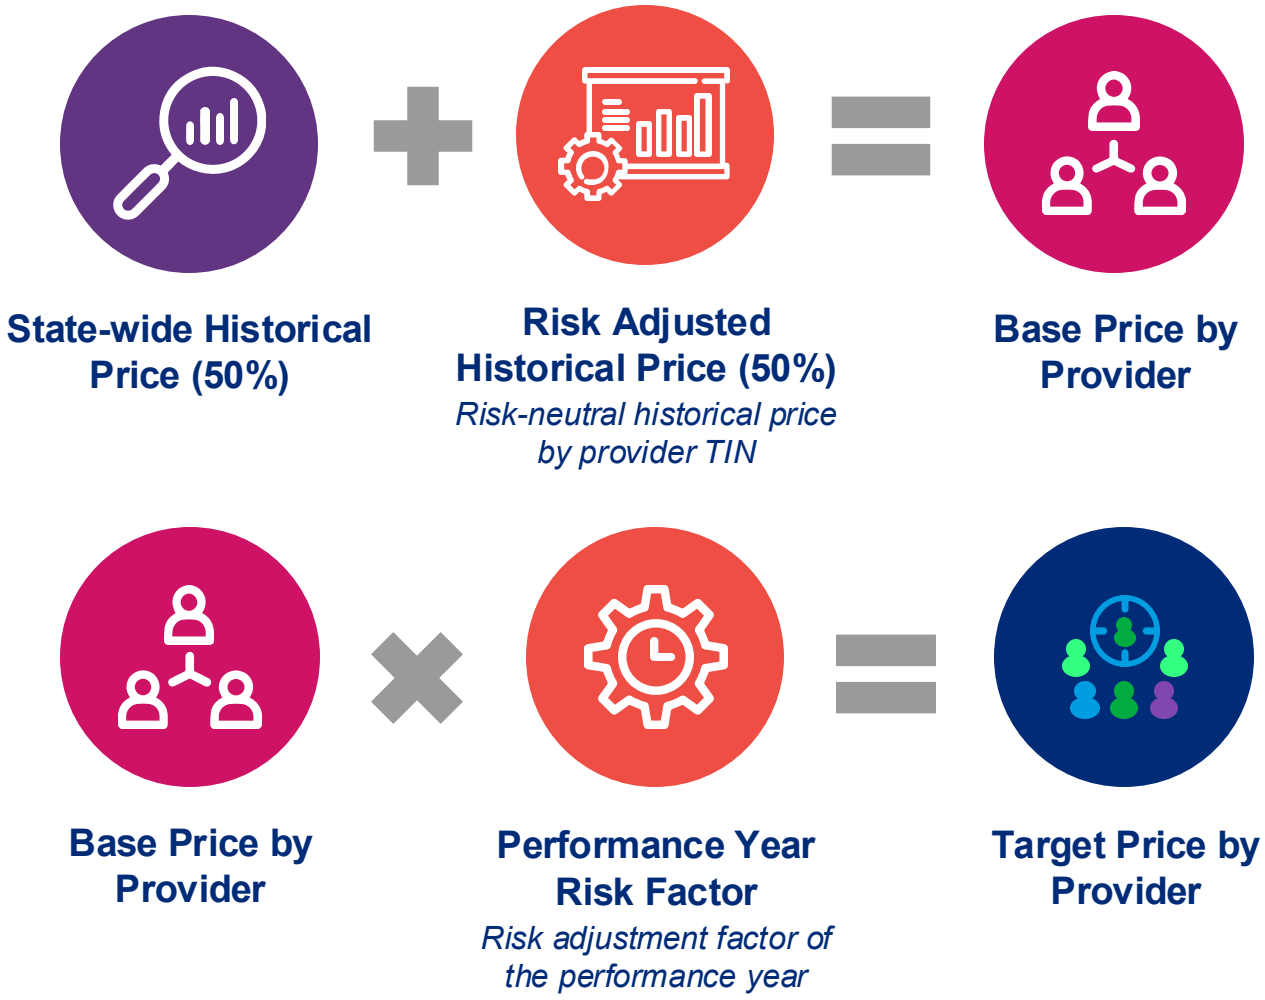
Historical Price

- Calculate the average standardized* episode cost of all services by provider TIN.
- Winsorize outliers — set the total episode cost thresholds between the fifth and 99th percentile.
- Trending — utilize DSS' institutional knowledge regarding fee schedule changes, etc..

** Standardization includes applying standard fee schedule by diagnosis related group and severity level. This process will be used for inpatient hospitals and some other services, if applicable.*

Risk Adjustment Factor

The historical year's risk adjustment factor, integrated with the Area Deprivation Index (an area-level measure of socioeconomic factor) will be used to risk adjust the historical price.



Quality Measures and Weights

This program has ten quality measures: five are pay-for-performance measures and five are pay-for-reporting measures.

Pay-for-Performance (71% Total)

1 Cesarean Birth (24%)

The proportion of live babies born at or beyond 37.0 weeks gestation to women in their first pregnancy, via cesarean birth.

2 Postpartum Care (18%)

Measures rate of timeliness of postpartum care for the maternity bundle project.

3 Prenatal Care (12%)

Measures the timeliness of prenatal care for the maternity bundle project.

4 Low Birth Weight (12%)

The proportion of infants with the International Classification of Diseases codes for light for gestational age, small for gestational age, low birth weight, or intensive care units care for low birthweight infants on newborn records among all births.

5 Maternal Adverse Events (6%)

The proportion of deliveries > = 20 weeks gestation with any of 21 maternal morbidities plus maternal mortality occurring during the delivery hospitalization, risk-adjusted using claims data.

Pay-for-Reporting (29%)

6 Contraception

(6% doula add-on
7% doula opt-out)

The proportion of mothers with live deliveries that reported contraceptive use within 90 days of delivery

7 Preterm Birth/Labor

(6% doula add-on
7% doula opt-out)

The proportion of preterm births/labors among the total number of live births

8 Doula Utilization[1]

(6% doula add-on
*N/A doula opt-out)**

Proportion of births attended by a doula.

9 Breastfeeding[2]

(6% doula add-on
7% doula opt-out)

Assesses the proportion of newborns exclusively fed breast milk during the newborn's entire hospitalization.

10 Behavioral Health Risk Assessment[2]

(6% doula add-on
7% doula opt-out)

Proportion of patients who gave birth and received a behavioral health screening risk assessment at the first prenatal visit of those patients who gave birth and had at least one prenatal visit

[1] 100% Encounter Form submission threshold required for measure reporting/payment.

[2] 90% Encounter Form submission threshold required for measure reporting/payment.

Quality Methodology and Scoring

Performance Tier Score Calculation

There are four steps to calculating the Performance Tier Score:

- **Step 1:** Normalize each Pay-for-Performance Metric against the Historical year minimum and maximum values.
  - Pay-for-Reporting Metrics are assigned a value of 1 if data for the metric is present otherwise 0 if no data is present.
- **Step 2:** Invert the appropriate metrics such that a higher score is better.
- **Step 3:** Ensure that the metrics are within the boundaries of 0 and 1.
- **Step 4:** Utilize the metric weights to calculate a final composite, metric-weighted Performance Score.

Improvement Tier Score Calculation

There are three additional steps to calculate the Improvement Tier Score:

- **Step 1:** The improvement tier score is calculated with the same steps as the Performance Tier Score, but from the Pay for Performance Metrics only.
- **Step 2:** Take the difference in the Current (2022) Pay-for-Performance Score from the Historical (2021) Pay-for-Performance Score.
- **Step 3:** Divide the difference between the Current (2022) and Historical (2021) scores to get the Improvement Tier Score.

Percentage of Shared Savings Earned

- The Performance Tier Score and Improvement Tier Score are each cross-walked to a Percentage of Shared Savings Earned. **The maximum Percentage of Shared Savings Earned between the two scores is selected as the final Percentage of Shared Earning Earned**.

Performance Tier Score

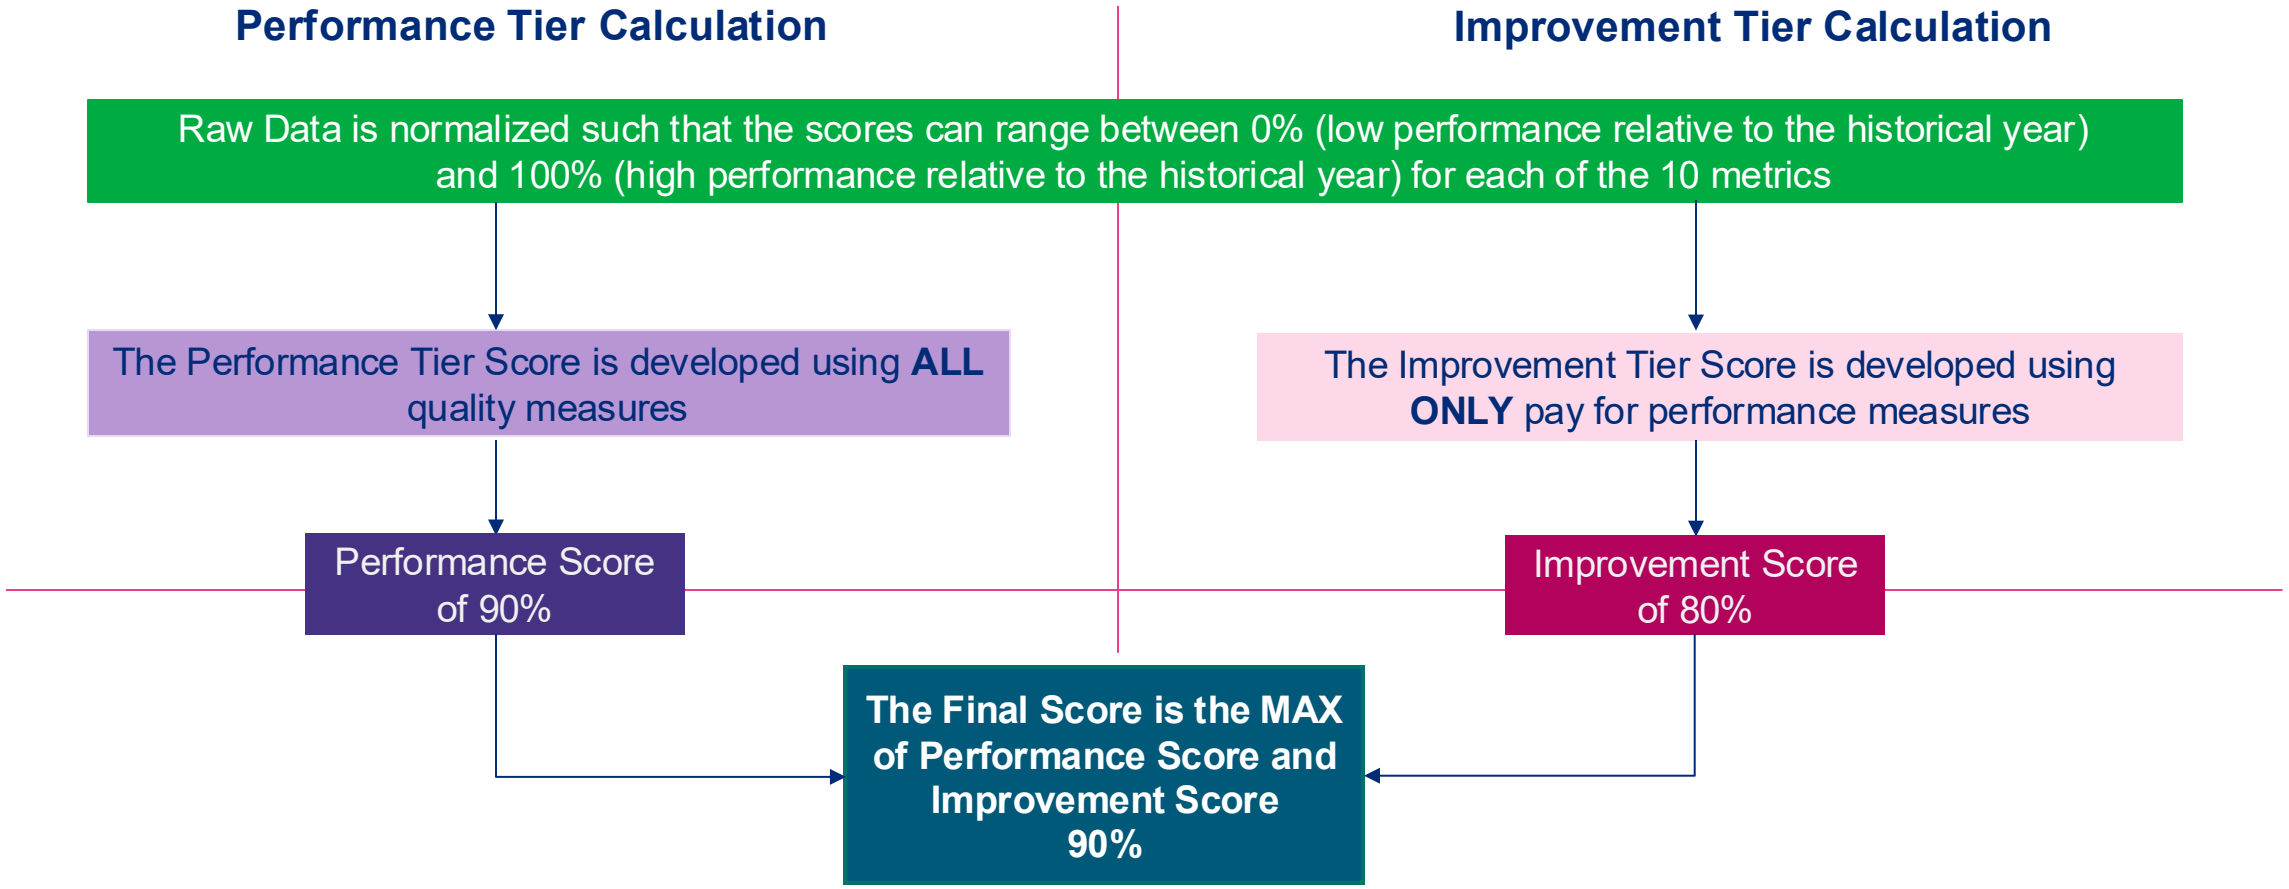
Overall Performance	Performance Earnings Tier	Performance: % Shared Savings
< 55th Percentile of peer group	F	50%
55–60th Percentile of peer group	D	60%
60–70th Percentile of peer group	C	70%
70–75th Percentile of peer group	B	80%
75–80th Percentile of peer group	A	90%
> 80th Percentile of peer group	S	100%

Improvement Tier Score

Improvement	Improvement Earnings Tier	Improvement: % Shared Savings
<0%	F	50%
0–3%	D	60%
3–5%	C	70%
5–10%	B	80%
10%+	A	90%

Quality Methodology Example

The distribution of incentive payments will be adjusted based on the accountable provider's quality performance. The example below illustrates how DSS will produce the final quality score.



Quality Gate Check

- Accountable providers who fall into Tier F for both the Performance Earnings Tier and the Improvement Earnings Tier will be required to submit a quality improvement plan in order to earn incentive payments.
- In the subsequent year, if an accountable provider consecutively maintains quality performance in Tier F for both tiers, the provider will be ineligible for the incentive payment that year.
