

## **Watershed Inspector Training Agenda**

**Tuesday, March 25, 2025 9:00 a.m.-3:00 p.m.**

**MDC Operations Facility & Training Center  
125 Maxim Road, Hartford, CT**

### **Workshop Goals**

- Provide key information on optimizing PWS watershed inspections
- Improve protection of public water supply sources
- Clarify regulatory responsibilities and provide tools to meet those responsibilities
- Introduce new tools and technologies
- Share inspection successes, challenges, and questions

### **Agenda**

|                                                                                                                                                                                      |              |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Sign In</b>                                                                                                                                                                       | <b>9:00</b>  |
| <b>Introduction/Watershed Inspection, GIS Tools Regulatory Overview</b><br><i>Eric McPhee, Connecticut Department of Health (CTDPH)</i>                                              | <b>9:15</b>  |
